Pointwise agreement: predicted vs actual variance
Each point is one test point; dotted line is y = x
O'Connell Fig. 3 setup: n = 400, 12 covariates, mtry = 4, node size 5
B = 1
B = 10
B = 8000
Mentch−Zhou setup: n = 100, p = 5, bagging, node size 1, SNR = 0.05
Predicted variance
Actual variance at test point
eq. (8)
Theorem 1
